

Upper Makefield Township Watershed Restoration Plan Community Workshop

Upper Makefield Township, with grant funding support from the Pennsylvania Department of Conservation and Natural Resources, initiated an assessment of the Houghs Creek and Jericho Creek Watersheds in Spring 2018. LandStudies, Inc., water resource engineers and scientists specializing in water resource planning and management, conducted assessments of both watersheds and have identified opportunities to improve water quality and to help alleviate flooding.

How you can help. . .

As a member of the community, we invite you to share your knowledge of local issues and opportunities for water resource protection and provide feedback on the opportunities identified thus far during these watershed assessments.

Community Workshop

Tuesday, September 11, 2018

7:00 to 9:00 pm

Please stop by to provide input, even if it is only for a short time!

Upper Makefield Township Office

1076 Eagle Road, Newtown, PA 18940

At this Workshop, we will discuss the project goals and provide background mapping, photos, and information on the watersheds. The majority of the session will be open to allow feedback from attendees on projects and opportunities which should be considered as part of the Watershed Restoration Plan for Upper Makefield Township.
