Environmental

• Carbon Filtration Systems

- What is a carbon filtration system and why is it the appropriate option?
- Requests to date
- Energy Transfer is committed to covering the cost of the system appropriate for each home
- Eligible residents can request installation at uppermakefieldresponse@energytransfer.com

Example of a typical carbon filtration system

Mt. Eyre Buffer Zone for Carbon Filtration System Installation

Environmental

- **Remediation / Act 2**

- Short-term product recovery
- Act 2 process in conjunction with DEP
- What is the Statewide Health Standard and why is that the recommended path forward?
- Commitment to future public engagement

Community Outreach

- Direct contact with more than 220 homeowners in the Mt. Eyre neighborhood and surrounding area
- Regular updates to Upper Makefield Township
- Website: <https://uppermakefield.incidentupdates.com/>
- Email: uppermakefieldresponse@energytransfer.com
- Phone: 1-877-397-3383
 - Our phone line is live staffed 24/7
- Further updates will also be communicated via mail and door-to-door outreach in the Mt. Eyre neighborhood

Community Outreach

- We have set up a community support center at our Bucks Pump Station
 - 1798 Dolington Road, Washingtons Crossing, PA
- Bottled water pickups, general information and requests

Future Meetings

- Proposed future community meetings:
 - Thursday, February 20
 - Thursday, February 27
- Future opportunities for in-person and / or virtual meetings

Next Steps

- Full focus on incident response
 - Operations and pipeline integrity work
 - Environmental testing and short-term remediation
 - Carbon filtration systems
 - Long-term remediation through PA DEP Act 2 requirements
 - Ongoing community outreach
 - Commitment to future community engagement
