

| Administrative Order Paragraph Reference | Daily Summary Progress Report: 11/07/2025*                                                                                               | Result               |
|------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------|----------------------|
| 1.e.i.                                   | Potable Wells Sampled                                                                                                                    | 364                  |
|                                          | Total Water Sampling Events (including 1st Round, 2nd Round, and subsequent rounds, and post-treatment)                                  | 1,451                |
|                                          | Laboratory Results Received (including 1st Round, 2nd Round, and subsequent rounds, and post-treatment)                                  | 1,438                |
|                                          | Potable Wells Samples Scheduled - Total (including 1st Round, 2nd Round, and subsequent rounds, and post-treatment)                      | 14                   |
|                                          | Potable Wells Samples Scheduled - 1st Rd                                                                                                 | 0                    |
|                                          | Potable Wells Samples Scheduled - 2nd or Subsequent Rounds or post-treatment                                                             | 14                   |
| 1.e.ii.                                  | Total tested potable wells that exceed statewide MSCs for VOCs or presence of LNAPL (historic aggregate)                                 | 8                    |
|                                          | LNAPL and dissolved VOC exceedances (historic aggregate)                                                                                 | 4                    |
|                                          | LNAPL with no VOCs (historic aggregate)                                                                                                  | 2                    |
|                                          | Dissolved VOC exceedance only (historic aggregate)                                                                                       | 2                    |
|                                          | Total tested potable wells that exceed statewide MSCs for VOCs or presence of LNAPL (as of current date)                                 | 4                    |
|                                          | LNAPL and dissolved VOC exceedances (as of current date)                                                                                 | 1                    |
|                                          | LNAPL with no VOCs (as of current date)                                                                                                  | 1                    |
|                                          | Dissolved VOC exceedance only (as of current date)                                                                                       | 2                    |
|                                          | Total tested Potable Wells with Detections of VOCs that do not exceed Statewide MSCs for VOCs (historic aggregate)                       | 21                   |
|                                          | Total tested Potable Wells with Detections of VOCs that do not exceed Statewide MSCs for VOCs (as of current date)                       | 9                    |
| 1.e.iii.                                 | Total tested Potable Wells with Detections of VOCs below standards but above Method Detection Limit "J Value" (historic aggregate)       | 29                   |
|                                          | Total tested Potable Wells with Detections of VOCs below standards but above Method Detection Limit "J Value" (as of current date)       | 8                    |
|                                          | Total Number of Properties with POET Installed                                                                                           | 202                  |
|                                          | POET Installed by Energy Transfer                                                                                                        | 112                  |
|                                          | POET Installed by Others that are known to Energy Transfer                                                                               | 74                   |
|                                          | POET Systems or other treatment systems for VOCs that were pre-existing                                                                  | 16                   |
| 1.e.iv.<br>(See detail on Tab 1.e.iv)    | Total Number of POET Systems Planned                                                                                                     | 3                    |
|                                          | Total POET Systems Planned - Energy Transfer                                                                                             | 0                    |
|                                          | Total POET Systems Planned - Land Owners                                                                                                 | 3                    |
|                                          | List of properties to date with operating POET or other treatment systems for VOCs                                                       | 202                  |
|                                          | List of properties to date with VOC detections that do not have a POET or other treatment system for VOCs (includes J value properties). | 3                    |
|                                          | List of properties to date with planned POET                                                                                             | 3                    |
| 1.e.v.                                   | List of properties to date with VOC detections where Energy Transfer does not know whether the property has a POET                       | 0                    |
|                                          | Properties that have requested POET and where Energy Transfer has declined to install or pay for the installation of POET                | 42                   |
| 1.e.vi.                                  | List of properties that have requested POET but Energy Transfer has declined to install/pay; reason for declining                        | See Tab 1.e.vi.      |
| 1.e.vii                                  | Tables of all property well sampling analytical results, property well gauging results, and wellhead field screening results             | See Attached Tables. |
| 1.e.viii                                 | Site characterization activities performed                                                                                               | See Tab 1.e.viii.    |
| 1.e.ix                                   | Site remediation activities performed                                                                                                    | See Tab 1.e.ix.      |
